

## A Satellite Primer on Tuberculosis

### Available on Videotape

Videotapes of the course, *A Satellite Primer on Tuberculosis*, are available for purchase. The videotapes should be used as a supplement to the *Self-Study Modules on Tuberculosis*. (For more information on the print-based modules, call (404) 639-8135.) Participants should work through each print-based module prior to viewing the corresponding videotape. Each videotape session is approximately 90 minutes.

The target audience for this training program is entry-level public health TB workers with little or no background in TB. This training is also appropriate for staff who are responsible for TB activities in correctional facilities, drug treatment centers, migrant clinics, nursing homes, homeless shelters, and other facilities.

**Transmission and Pathogenesis of Tuberculosis** - Originally broadcast May 4, 1995; faculty presenter: Paula Fujiwara, MD, MPH. Provides information on the history of TB, how TB is spread from person to person, and how TB disease develops in the body.

\$25.00 each                      no. of copies \_\_\_\_\_                      total \_\_\_\_\_

**Epidemiology of Tuberculosis** - Originally broadcast May 11, 1995; faculty presenter: Eugene McCray, MD. Provides information on recent trends in TB in the United States and describes groups of people who are at higher risk for TB infection and disease.

\$25.00                      no. of copies \_\_\_\_\_                      total \_\_\_\_\_
